Enthusiastic about combining my passion for web development and cybersecurity, I am particularly keen on incident management through SIEM and the implementation of security policies. My goal is to effectively defend systems against cyber threats by applying innovative strategies and staying updated on security trends. My approach is characterized by diligence, sociability, and unwavering motivation, making me confident in my ability to seamlessly integrate into a team environment where I am eager to collaborate and continue learning.

EDUCATION

Bachelor of Information Technology Engineering| ETS   In progress

DEC in Information Technology | Teccart Institute   2018-2020

Internship – Cybersecurity Integrator| City of Montreal   Winter 2024

- Handling incidents and client requests for the operational security team
- Analyzing and processing SIEM alerts (QRadar)
- Proposing improvements (detection rules, false positives)

- Participating in change advisory board meetings
- Proficiency in operational tools (Confluence, Jira, others)
- Documenting procedures for effective knowledge transfer

CERTIFICATIONS

- **Udemy :** Hacking Éthique , ComptTIA A+ Core 1 (En cours)

- **Trend Micro Vision One Workshop**

SKILLS & LANGUAGES

- **Security**: Nmap, Metasploit, Trend Micro, QRadar, Microsoft Security Defender
- **Languages**: Python, JavaScript, PHP, ReactJS, Java
- **Tools**: Wireshark, Git, MySQL, NodeJS, Photoshop, Adobe Premiere Pro
- **Frameworks**: TailwindCSS
- **Data Management**: Power BI, Excel, SQL
- **Virtualization**: Linux, VMware, Virtual Box
- **Languages**: French (native), English (fluent)

PROJECT EXPERIENCE

Autocar
Visit Page
This is a multipage website of a fictitious car rental company using React App. Also made with a mix of Tailwind CSS and the use of components and assets such as SVG.

What I've learned:

- Build a React App from scratch
- The use of TailwindCSS
- Layout and screen size

Service Website

Visit Page

This two-pages website is about a fictional tech company built with HTML and CSS. This project helps me to become more comfortable with Bootstrap, CSS skills as flexbox and media queries

What I've learned:

- Getting more familiar with the positionnement
- Responsive design features

Restaurant

Visit Page

A website to manage restaurant data, create a member account and view information, your menus. A login page to connect and make his own changes.

What I've learned:

- Manage database
- Select, update, delete data with SQL
- Sharpen my Php Skills
